

Name: _____

Date: _____

Wildlife Survey

Guiding Question: How do resources, and such abiotic factors as weather, soil, and water, affect the abundance of plants and animals in an ecosystem?

Study Area Location: _____

Current Weather Conditions: Temperature _____ °F or °C

Sky: Clear Scattered Clouds Mostly Cloudy Complete Cloud Cover

Wind: calm breezy gusty

Wildlife Seen or Heard at the Site:

Put a small tally mark in the correct columns each time you see or hear a **different animal**.

Wildlife Seen or Heard	<u>Total Number of Different Animals</u>		Notes or Information (Remarks to help you remember what you observed)
	Found in the Site (nesting, standing, hunting, sleeping)	Just passing through (walking or flying across the site)	
Birds			
Mammals			
Reptiles and Amphibians			
Arthropods			
Other invertebrates			

Note: If you see a large number of animals (such as a line of ants), you can write the actual number down and add it to the tally later.
